

Dear Student Researcher,

We would like to thank you for joining our investigative team here at the Albany Pine Bush Preserve Commission. Our goal is to maintain and restore the globally rare Pine Bush ecosystem. We need to do research so that we can determine the best ways to do this. Your help in this research will allow us to raise public awareness and create an informed community. An informed community will insure the future of the Pine Bush.

Sincerely,

Christopher Hawver

Christopher Hawver, Executive Director
Albany Pine Bush Preserve Commission
